PLANT AND SOIL

Contents Volume 275 Nos. 1–2 August 2005

Part I

Kinetics of Soil Physico-Chemical Processes

Guest editors:
Friederike Lang & Wolfgang Wilcke

Preface

Kinetics of soil physico-chemical processes vii

H-NMR relaxometry to monitor wetting and swelling kinetics in high-organic matter soils
G.E. Schaumann, E. Hobley, J. Hurraß and W. Rotard 1–20

A kinetic approach to predict soil trace metal bioavailability: preliminary results
A. Bermond, G. Varrault, V. Sappin-Didier and M. Mench 21–29

Kinetics of polycyclic aromatic hydrocarbon (PAH) degradation in long-term polluted soils during bioremediation
S. Thiele-Bruhn and G.W. Brümmer 31–42

Impact of atmospheric nitrogen deposition on carbon dynamics in two Scots pine forest soils of Northern Germany
E.T. Scheuner and F. Makeschin 43–54

Part II

Regular Papers

QTLs for nutritional contents of rice seedlings (*Oryza sativa* L.) in solution cultures and its implication to tolerance to iron-toxicity
A. Shimizu, C.Q. Guerta, G.B. Gregorio, S. Kawasaki and H. Ikehashi 57–66

Changes in Hg fractionation in soil induced by willow
Y. Wang, C. Stauffer, C. Keller and M. Greger 67–75

Application of GMOs in the U.S.: EPA research & regulatory considerations related to soil systems
P. Sayre and R.J. Seidler 77–91

Multielement isotope ratios of vegetables from integrated and organic production
M. Georgi, S. Voerkelius, A. Rossmann, J. Graßmann and W.H. Schnitzler 93–100

How does the fungal endophyte *Neotyphodium coenophialum* affect tall fescue (*Festuca arundinacea*) rhizodeposition and soil microorganisms?
M.M. Van Hecke, A.M. Treonis and J.R. Kaufman 101–109

Effects of Ca- and Fe-rich seepage on P availability and plant performance in calcareous dune soils
C. Bakker, J. Rodenburg and P.M. van Bodegom **111–122**

Neotropical legume tree *Inga edulis* forms N_2-fixing symbiosis with fast-growing *Bradyrhizobium* strains
H.A. Leblanc, R.L. McGraw, P. Nygren and C. Le Roux **123–133**

A comparison of soil microbial community structure, protozoa and nematodes in field plots of conventional and genetically modified maize expressing the *Bacillus thuringiensis* CrylAb toxin
B.S. Griffiths, S. Caul, J. Thompson, A.N.E. Birch, C. Scrimgeour, M.N. Andersen, J. Cortet, A. Messéan, C. Sausse, B. Lacroix and P.H. Krogh **135–146**

Effect of inoculation with non-indigenous and indigenous rhizobacteria of Erzurum (Turkey) origin on growth and yield of spring barley
A. Salantur, A. Ozturk, S. Akten, F. Sahin and F. Donmez **147–156**

Changes in the above- and below-ground biomass and nutrient pools of ground vegetation after clear-cutting of a mixed boreal forest
M. Palviainen, L. Finér, H. Mannerkoski, S. Piirainen and M. Starr **157–167**

Increased topsoil mineral nutrient concentrations under exotic invasive plants in Belgium
S. Vanderhoeven, N. Dassonville and P. Meerts **169–179**

Influence of arbuscular mycorrhizal (AM) symbiosis on phosphorus leaching through soil cores
H.R. Asghari, D.J. Chittleborough, F.A. Smith and S.E. Smith **181–193**

Water potential and gas exchange did not reflect performance of *Pinus radiata* D. Don in an agroforestry system under conditions of soil-water deficit in a temperate environment
I.A.M. Yunusa, S.E. Thomson, K.P. Pollock, L. Youwei and D.J. Mead **195–206**

Influence of aspen on forest floor properties in black spruce-dominated stands
S. Légaré, D. Paré and Y. Bergeron **207–220**

Interactions between *Tamarix ramosissima* (saltcedar), *Populus fremontii* (cottonwood), and mycorrhizal fungi: Effects on seedling growth and plant species coexistence
V.B. Beauchamp, J.C. Stromberg and J.C. Stutz **221–231**

Effect of thioligands on plant-Hg accumulation and volatilisation from mercury-contaminated mine tailings
F.N. Moreno, C.W.N. Anderson, R.B. Stewart, B.H. Robinson, R. Nomura, M. Ghomshei and J.A. Meech **233–246**

Soil fertility of afforested arable land compared to continuously forested sites
A. Wall and J. Hytönen **247–260**

Symbiotic nitrogen fixation in eight *Acacia senegal* provenances in dryland clays of the Blue Nile Sudan estimated by the ^{15}N natural abundance method
E.A.Y. Raddad, A.A. Salih, M.A. El Fadl, V. Kaarakka and O. Luukkanen **261–269**

Solid-state ^{15}N NMR analysis of highly ^{15}N-enriched plant materials
R.J. Smernik and J.A. Baldock **271–283**

Preferential utilization of organic and inorganic sources of phosphorus by wheat plant
J.C. Tarafdar and N. Claassen **285–293**

Changes in the microbial community in a forest soil amended with aluminium *in situ*
E.J. Joner, T.D. Eldhuset, H. Lange and Å. Frostegård **295–304**

Plant growth, nutrient acquisition and mycorrhizal symbioses of a waterlogging tolerant legume (*Lotus glaber* Mill.) in a saline-sodic soil
R. Mendoza, V. Escudero and I. García **305–315**

Animal treading during wet soil conditions reduces N_2 fixation in mixed clover-grass pasture
J.C. Menneer, S. Ledgard, C. McLay and W. Silvester **317–325**

Influence of mature Douglas fir roots on the solid soil phase of the rhizosphere and its solution chemistry
M.-P. Turpault, C. Utérano, J.-P. Boudot and J. Ranger **327–336**

The effect of take-all disease on gas-exchange rates and biomass in two winter wheat lines with different drought response
M. Balota, C.M. Rush, W.A. Payne and M.D. Lazar **337–348**

Effects of the mycorrhizal fungus *Glomus intraradices* on uranium uptake and accumulation by *Medicago truncatula* L. from uranium-contaminated soil
B. Chen, I. Jakobsen, P. Roos and Y.-G. Zhu **349–359**

Litter N retention over winter for a low and a high phenolic species in the alpine tundra
H. Steltzer and W.D. Bowman **361–370**

Arctic and subarctic soil populations of *Rhizobium leguminosarum* biovar *trifolii* nodulating three different clover species: Characterisation by diversity at chromosomal and symbiosis loci
I.L. Fagerli and M.M. Svenning **371–381**
